An Information Technology student in President University focusing on AI, the skills and knowledge I developed include frontend development, UI/UX design, and machine learning. I am also adept in creative design through years of my hobby in video editing and graphic design and job requests from student organizations from other universities. My expertise extends to social media and marketing as I have experience in being a social media manager, content creator, and head of marketing.

Work Experiences

PT. Bimaruna Jaya - Jakarta Timur, Indonesia   Oct 2024 - Present
IT Intern
PT. Bimaruna Jaya provides customers with an advanced-level services through it's integrated logistics solutions by securing regional bases and combining hardware and software to achieve the most effective results.
- Developed a system to manage and visualize warehouse reports using Next.js and PostgreSQL
- Replicated the warehouse's Excel workbook in Power BI for a more simple and accessible alternative

AkunImpact - Indonesia   Feb 2024 - Present
Social Media Manager, Content Creator, Head of Marketing
AkunImpact is a startup business that acts as a middleman for video game accounts. They facilitate transactions between sellers and buyers of these accounts.
- Increased Instagram following by over 30%, demonstrating an adept understanding of audience engagement and growth strategies.
- Reached over 1 million impressions and engagements through Instagram content and reels, showcasing exceptional content creation and social media marketing skills.
- Edited and posted daily reels and content to captivate audiences.
- Designed feed posts, reels templates, and posters for giveaways, events, and other initiatives.
- Planned and reached out to other communities or influencers to host collaborations, boosting engagement and building connections and relationships.
- Led the Project Manager role for the 2023 anniversary event, assigning members to crucial roles and creating the whole event rundown.

Education Level

Universitas Presiden - Cikarang   Aug 2022 - Nov 2025 (Expected)
Undergraduate Information Techonology, 3.72/4.00
- Developed numerous projects for coursework in Artificial Intelligence, Mobile Programming, Natural Language Processing, and more.

John Paul's School - Bekasi   Jul 2019 - May 2022
High School Diploma in IPA
- Honed English language proficiency for over 12 years through Cambridge and Edexcel curriculums.

Projects

Utacy - Cikarang, Indonesia   Apr 2023 - May 2023
Fullstack Developer
Utacy is a local music player web app I built myself using HTML, CSS, JavaScript, PHP, and MySQL. It lets users play their own music library stored on their device and has a user interface inspired by Spotify.
- Built responsive web interfaces with HTML & CSS.
- Built interactable music player assets like buttons, sliders, and volume control using JavaScript.
- Handled backend, creating the MySQL database structure and allowing the songs to be played and displayed through PHP.

Eaterly - Cikarang, Indonesia   Nov 2023 - Dec 2023
Fullstack Developer
Eaterly is a group project made in Android Studio that aims to reduce long canteen queues at President University. This Point-of-Sale mobile app allows students to order and pay for food electronically, streamlining the process and reducing wait times. Eaterly aims to improve both the student experience and canteen efficiency. It is made with Kotlin and Firebase, and I was tasked with some crucial features during the development of the app.
- Created the registration page for users which seperates logins for customers and sellers/vendors by utilizing the Firebase collection.
- Created the welcome page and form page for brand new sellers to register their counter to the database.
- Made a reusable image preview code for uploaded pictures, which were then used in my counter registration page and other features

like adding menu.
- Created the home page for sellers that shows their counter name, description, and picture.
- Generated custom QR codes filled with table numbers using Python, allowing the main feature of the app to work.

AkunImpact Outlook - Cikarang, Indonesia   Apr 2024
Fullstack Developer

AkunImpact Outlook is a financial analysis website developed for AkunImpact, leveraging recent transaction data. Collaborating with my group members, we built the site using Laravel. I handled the data of payment methods and payment handlers, displaying their total count and rank in a chart and graph.

- Managed the project using GitHub for version control and collaboration.
- Focused on implementing interactive charts using Chart.js library.
- Collaborated with team members to integrate the charts into the Laravel-based website seamlessly.

UtacyLyrics - Cikarang, Indonesia   May 2024 - Jun 2024
Fullstack Developer

UtacyLyrics is a music web app that allows you to search for lyrics of your favorite songs. The app also provides the feature to romanize lyrics in native characters to the Latin alphabet. I made the app alone for my AI final project using React and Tailwind.

- Handled both frontend and backend systems
- Designed a minimalistic and dynamic UI
- Implemented the Genius and Gemini API

BRJ Warehouse Report Management - Jakarta Timur, Indonesia   Oct 2024 - Present
Fullstack Developer

BRJ-WRM is an internal web application developed to display PT. Bimaruna Jaya's inbound and outbound data as charts, tables, and statistics.

- Created the database structure in PostgreSQL
- Utilized Next JS as the framework
- Designed the frontend with shadcn for efficiency and consistency
